INTRODUCTION:

Education Plays a Significant role in the Progress of human race. Educated peoples are the responsible for the better future of Society (or) Country. Education system determines the development of a Country. A well-educated country is known as a well-developed country because education provides the country Prosperity, wealth and fame.

IMPORTANCE OF EDUCATION FOR INDIVIDUALS

Education starts from childhood and lasts upto life time period. It makes people noble and perfect. The more educated we are, the more qualities we will have. Education is the only tool to have a bright future.

Education help us to achieve knowledge. Education gives us world - wide information and basic knowledge about the society and also helps us to live a balanced life and makes us mentally healthy.

IMPORTANCE OF EDUCATION FOR COUNTRY:

A nation is growing day by day just because of its technology and education. Education is must to boost economic growth and increase income. It also promotes the health status of a country.

A country can be serviceable on behalf of education. A quality education gives many invention and industrial development.

IMPORTANCE OF EDUCATION FOR SOCIETY:

A nation can never grow without education. Society can survive if it provides its youth option for education, better employment and pleasant liveliness.

Education assists in completing the process of socialisation. Education makes good citizen also. A cultured person is the outcome of a robust education system. Educated society people are open-minded and do not prefer to judge others

Educated people have a key to secure their future ethically. An educated individual is brave, confident and smart as well. Education makes humankind generous and also improves the personality of humans.

Education makes people respect others, give importance to others and treat others. Additionally, they know the value of natural resources, thus protect them. Educated people love to live in a hygienic, clean and fresh environment and also they help to preserve the nature.

CONCLUSION:

Education is a ray of light in the darkness. Education is a basic right of every human on this planet. Above all, the governments of all countries must ensure to spread education.
